

July 1, 2026

To Whom It May Concern:

Stefan Bittmann, member number 61240662, joined The American Association for the Advancement of Science on June 30, 2026, and his current membership is active until June 30, 2027.

Since its founding in 1848, the American Association for the Advancement of Science has continually worked to advance science. From its early, specific aims concerned with communication and cooperation among scientists, the Association's goals now encompass the broader purpose of "...furthering the work of scientists, facilitating cooperation among them, fostering scientific freedom and responsibility, improving the effectiveness of science in the promotion of human welfare, advancing education in science, and increasing the public understanding and appreciation the importance of the methods of science in human progress."

Beginning with 461 founding members in 1848, AAAS now enrolls over 120,000 scientists, engineers, science educators, policymakers, and others interested in science and technology that live and work in the United States and in many other countries throughout the world. In addition, AAAS is the world's largest federation of scientific and engineering societies, with 283 organizations that cooperate with the Association on a variety of projects, including Annual Meeting symposia, fellowships, international programs, annual analyses of the federal research and development budget, equality opportunity activities, and science education.

If you have any questions, please contact the Office of Membership at (202) 326-6417.

Sincerely,

Romane Crispin
